HARROLD'S - REVIEW

January 1, 1944.

Vol. 3, No. 1.

HARROLD'S PANSY GARDENS & GREENHOUSES

P. O. BOX 29 — GRANTS PASS, OREGON.

OUR FORTY-SECOND YEAR

Having two years experience since the adoption of this form of trade list we are making improvements in its format in an effort to make it more useful to you. For the duration we shall issue only this series of folders scattered over the active seasons of the year. A copy of each edition will be mailed to all customers of record, as well as all tradesmen who have requested them in the past two years, as each issue is printed.

As in the past, it will be our endeavor to offer in each issue the group of stock that is of immediate interest but it should be remembered that most seed items are available throughout the year. For that reason we suggest that you keep a complete file of these folders as by so doing you will have a complete catalogue of our stock at all times. In the event that copies become lost another can always be obtained on request.

In regard to prices, we hope to maintain these as stable as market conditions permit and will try and keep these current in each list. In all cases, of course, the quotation on any group of stock given in the latest published issue will apply - subject to unforeseen market changes, taxes or government regulations which force a change in price. In such case these prices are subject to change without notice according to usual trade practice.

Pansies Are Getting Scarce

There Already Exists A Shortage Of Pansy Plants

Better plant seeds NOW for any additional Pansies you will need during April and May.

Pansy seeds planted by the large wholesale plant growers last summer and fall were substantially below plantings made by these growers in the past because of lack of help. Because of this there is not now the normal quantity of Pansy plants available to cover the trade demand. While many growers planted a little more heavily for their individual needs this was not a really general condition as we have discovered from the extreme demand made upon our plant stocks last fall. From the beginning of the fall plant shipping season Oct. 1st., until the holiday shutdown Dec. 10th., we had shipped more Pansy plants than we normally do by March 1st. This leaves our stock limited (about 150,000) for the spring shipping season. In fact about 25% of normal. Similar conditions have been reported to us by other growers so that "scarce" is the prospect. Because of these conditions we recommend IMMEDIATE ordering of your plant requirements OR THE PLANTING OF ADDITIONAL SEEDS NOW!

There is adequate seed available in our stock in all varieties offered here to meet a reasonable increase in spring planting and we can render good, prompt service on your requirements for these. ORDER AT ONCE!

SPRING CULTURE OF PANSIES

The sowing of Pansy seeds in winter for spring sale is not as widely practiced as it should or could be. While this method does not give the large plant size and early flowers that is obtained with Aug. planting and fall transplanting, it does afford a source of good stock to meet the vast bedding plant market of late March, April and May. Germination is higher and less care is required to grow the maximum number of plants from a given quantity of seed than when planting in late summer. Little heat is needed except during the actual period of germination (a 50 degree night temperature is best) and the plants can be shifted outside into cold frames or a protected situation as soon as the severe weather is over making them a plant of modest cost to grow.

Using a rich sandy loam soil, plant in flats or greenhouse bench in Jan. if possible. Stock for mid-May can, however, be grown from plantings made as late as Feb. 20th., if pushed along a little. Cover seeds lightly (not over $\frac{1}{4}$ inch) with same material or pure granulated peat moss. Keep moist but not soaked until germination takes place in 7 to 10 days. As soon as seed leaves have unfolded hold on the dry side to prevent damping off giving just enough water to keep the plants coming along nicely.

For best spring plants seedlings may be flat transplanted when the sixth leaf has developed and then reset into cold frames as soon as heavy ground freezing is over outside. If sown thinly and carried cold they may be successfully set directly into the outside beds from the seedling flat although development will not be as rapid this way. Soil into which all transplanting is done will benefit by a liberal application of rotted cow manure or a commercial 4-12-4 formula will give good results. Bone meal may be added to the transplanting soil for the long pull of development also. Soil acidity should be about pH 6.8 or Sudbury B. Drainage MUST be good. Handled in this manner you will be pleasantly surprised how easily a nice, profitable lot of stock can be grown and you'll need it this spring.

Pansy Seeds

HARROLD'S PEDIGREED STRAIN

We believe that the following group of varieties is the finest and most complete available today and that among this selection will be found types that will satisfy any need. For full descriptions see the June or August issues of this publication. We will be glad to supply either or both of these back issues free.

Best Mixtures

TRIMARDEAU GIANTS: This is an old time bedding favorite.60	1.00	1.50	2.75	5.00	9.50

To obtain the pound price multiply the ounce price by ten.
Four ounces of a variety will be supplied at the pound rate.

PANSY PLANTS

As mentioned previously in this folder, our stock of Pansy plants is very modest indeed for this time of year. We offer the following list of varieties as long as stock lasts and will accept **NO HOLD ORDERS** for spring delivery as stock is so limited that we want to clear the nursery space as rapidly as we can for spring use. **IF YOU WANT PLANTS, ORDER AT ONCE WHILE AVAILABLE.**

These plants are grown in open field beds, Sept. sown and are perfectly hardy. Plants are from 4 to 8 leaves — just a nice size for transplanting either into flats or coldframes. We also have a few thousand in a cold greenhouse that are in an active state of growth that will develop faster in a mild climate. These would be ideal for California growers who want to flat them. If these are wanted specify indoor stock when ordering. The larger Aug. sown stock we offered in the fall is all sold out and no transplanted plants will be available the rest of season. Separate colors offered below are August sown and are larger.

VARIETY	PRICE PER 100	1,000
HARROLD'S PEDIGREED CUT-FLOWER PANSIES —		
TALL SELECTION — Plants grow 3' to 4'. Very long stems.	\$3.00	\$25.00
ORIGINAL STRAIN — Shorter growth but long stemmed flowers.	2.00	15.00
HARROLD'S PEDIGREED SWISS GIANTS — The finest and most modern "Swiss" type variety. Very Fine.	1.50	8.00
HARROLD'S PEDIGREED GIANT ART-SHADES — The ultimate in the Exhibition types. Large size, exquisite color range.	1.50	8.00
HARROLD'S PEDIGREED GIANTS — This has been our most popular bedding variety for many years.	1.25	6.50
HARROLD'S IMPROVED SWISS — A grand Fancy type.	1.25	6.00
HARROLD'S ALL-AMERICAN BEDDING MIXTURE — A select mixture of ALL the varieties we grow.	1.25	6.00
HARROLD'S AZURE GIANTS — Finest brilliant deep blue.	1.50	10.00
HARROLD'S GOLDEN GIANTS — Best golden yellow blotched.	1.50	10.00
HARROLD'S RUBY GIANTS — Best selection of red shades.	1.50	10.00
CORONATION GOLD — Finest pure yellow self. Attractive.	1.50	10.00
SWISS PURE WHITE — The BEST pure white Pansy.	1.50	10.00

Not less than 100 sold. Less than 250 of a variety take the 100 rate.

DELPHINIUM ROOTS
Pacific Giant Hybrids

We have a few thousand of these roots which were seeded in the summer of 1941. Originally the planting was composed entirely of all the named varieties of the **PACIFIC GIANT HYBRIDS**, the seeds being genuine V. & R. originators stock. In the past two seasons we have sold from these plantings but this year, while there is still some of all varieties left, there is not enough of any one to be worthwhile listing as named sorts. We are therefore offering them as a mixture and in shipping we will see that the color blend will be well balanced. This is an exceptionally fine collection of varieties and they will be found very usable either for forcing or retail sale.

25 for \$2.50 — 100 for \$9.00
NOT LESS THAN 25 ROOTS SOLD

Specialty

A NEW HARROLD

Hardy Primroses

We have been working with the varieties *Primula polyantha* and *veris* and their hybrids for over six years on a definite breeding basis. The longer we grow these plants the more valuable their appeal seems to us and we believe that many florists and nurserymen are overlooking a very valuable group of stock if they have not given them a trial. The newer strains thrive over a wide range of cultural conditions and are less exacting as to culture although they do best in a situation that has always proven favorable. The ideal situation is an eastern exposure where they may be protected from the afternoon sun and drying winds. Coolness, some shade, ample moisture and good drainage along with a light to medium woodland type of soil gives best results. They are ideal rockgarden subjects and once established should not be disturbed over a period of 4 to 5 years. In hardness they will withstand the winters in all sections of the U. S. with a light mulch or a covering of evergreen boughs.

Culture is Simple

The plants offered here may be established outdoors as soon as ground freezing is past. They are best obtained before mid-March and established in small pots for retail sale during the spring. These plants may also be set outdoors from these pots to grow specimen stock for fall sale.

Seeds may be planted in a warm greenhouse until the end of February or in cold frames in April and May. These will produce plants for setting out in Sept. Plantings may also be made in July and August.

The soil should be light and seeds covered lightly. We plant on top of a 1/4 in. layer of sphagnum moss and do not cover seeds at all but cover the flat with a pane of glass until germination is completed. This avoids damping off and gives a maximum germination. Avoid excessive moisture but see that the moss is well damp at all times. If covering with soil do not apply more than 1/8 in. Keep in a shaded situation until germination takes place.

As the seedlings become large enough, about 4 to 6 leaves, prick off into flats and keep in a cool section of the house; shifting as they are large enough to individual pots. Plunge pots to rim in soil to maintain cool soil and even moisture. When setting into their final position add humus or leafmold to the soil as the established plant likes a deep, moist, rich loamy soil that is well drained. Keep commercial chemical fertilizers off but use rotted cow manure moderately.

Late winter and spring sown plants may be set into their permanent situation to best advantage in September while summer and fall plantings set best the following spring. Plants may also be propagated by dividing old plants in Sept.

HARROLD'S Pedigreed GIANTS

This is a new strain of *Polyantha veris* hybrids on which we have worked for more than six years. The plants are compact and of robust growth while the flowers are born well above the foliage on fine long stems. Flowers are large, often as big as a silver dollar in clusters from 4 to 8 inches across. Colors are outstandingly brilliant and varied — including yellows, reds, and purples of real brilliance as well as pinks, blues and bronzes that are rare.

PLANTS AVAILABLE AS FOLLOWS

From 2 1/2 inch pots, 25 for \$3.75; 50 for \$6.00; 100 or more, 10c each.
Orders for this size booked for shipment after February 10th.

Transplanted and ready for potting, 50 for \$4.00; 100 for \$7.50; 250 or more at the rate of \$60.00 per 1,000. — From seedling flat ready for transplanting, \$5.00 per 100; \$42.50 per 1,000.

Not less than the smallest quantity quoted sold. 250 or more take the 1,000 rate.

SEEDS OF PRIMULA HARROLD'S Pedigreed GIANTS

Price Per Trade Packet — about 200 seeds, \$1.00; 3 pkts for \$2.50

1/16 oz. about 1500 seeds, \$5.00; 1/8 oz. \$9.50; 1/4 oz. \$18.00.

FRESH SEEDS OF HIGH GERMINATION — SUPPLY LIMITED

OTHER HARDY PRIMROSES

VARIETY	Price Per Tr. Pkt.	1/16 oz.	1/8 oz.	1/4 oz.
ARICULA: Fine large flowers. Pastel shades mixed. These differ from the rest of this group having smooth leaves. Flowers have dark edges with light center blotch.	\$.60	\$1.50	\$4.25	\$8.00
BULLESIANA HYBRIDS: Yellow to carmine.60	1.50	4.25	8.00
BERKELEY'S SUPREME: NEW. A <i>polyantha-veris</i> of exquisite size and coloring. Many unusual shades.	1.00	2.00	6.00	11.00

FREE AIR MAIL SERVICE (Seeds Only)

Orders arriving by Air Mail accompanied by full remittance and amounting to \$5.00 or more in seeds listing at \$3.00 per ounce or more will be returned to you by Air Mail without any extra charge. For this service order **MUST** arrive by Air Mail and fulfill the minimum as to price of seeds and amount of order. In the event you want this service on cheaper seeds or smaller orders remit 8 cents per net ounce of seed ordered. This offer void should postage rates be raised.

Southern Oregon Grown

GLADIOLUS BULBS

Gladiolus from this region have made a national reputation during the past 20 years by their high quality. The only trouble this year is that there is not enough of them. Labor conditions have necessitated a reduction of acreage and as this was forced upon us last spring at planting time it was only natural that the varieties being grown be given the closest examination as to their value. The selection offered below is a collection of the finest. Our stock is but about one-third of normal and for that reason we suggest immediate ordering.

VARIETY	COLOR	Price Per 100	No. 1	No. 2	No. 3	No. 4
ALADDIN:	Beautiful ruffled salmon.	\$4.65	\$4.00	\$3.35	\$2.70

PELEGRINA:	Dark violet blue.	2.00	1.80	1.50	1.20	
PICARDY:	Popular apricot pink.	2.75	2.30	2.00	1.80	
REWI FALLU:	Giant blood red.				1.75	
ROSA VAN LIMA:	New soft mauve pink. Early.	4.00	3.75	3.50	3.00	
SHIRLEY TEMPLE:	Large cream, ruffled heavily.	2.20	1.90	1.70	1.50	
TOKEN:	Brilliant flame pink. Early.	2.00	1.80	1.50	1.20	
VAGABOND PRINCE:	Garnet brown, ruby throat.	3.35	3.00	2.70	2.50	
WERTEMBERGIA:	Deep red with white blotch.	2.00	1.80	1.50	1.20	
PEDIGREED BLEND:	Made up from the finest of the late introductions.	3.35	3.00	2.70	2.50	
CUT FLOWER MIXED:	A selection of cutting types.	2.00	1.80	1.70	1.50	

Because of the limited supply this year it is more necessary than ever to stress that this offer is subject to prior sale. Also it is most advisable, where possible to mention a second choice on each variety or to make several second choice selections that may be used if any items in your order can not be supplied. As in the past, unless requested not to do so, we will substitute the nearest available size in variety ordered (if available) to the same value if sold out of size ordered.

TERMS on bulbs are for delivery f. o. b. the office of the transport agency at Grants Pass, Ore., on a basis of cash with order.

A DISCOUNT OF 5% MAY BE TAKEN ON ITEMS OF 250 OR MORE OF A VARIETY & SIZE — NOT LESS THAN 25 OF A SIZE & KIND SOLD.

FLORIST STRAIN STOCK PLANTS

Early Colonial

A new race of stocks. Tall and exclusively branching they do not produce a terminal spike but branch from the base; producing 8 to 10 spikes 30" long with a plant spread of about 16". These flower two weeks earlier than the Perpetual Branching types. The florets are double and about 2" in diameter. Doubleness is about 70%. WE HIGHLY RECOMMEND THESE FOR CUTTING.

VARIETY	COLOR	Price per 100
MAYFLOWER:	Fine rose red.	\$1.25
PRISCILLA:	Silvery lavender.	1.25
PURITAN:	Glowing pure white.	1.25
ROSE STANDISH:	Bright rose.	1.25
COLONIAL SUPERB MIXED:	Well balanced in the above shades.	1.15

Double Giants Of California

With years of experience with these we believe them better than the Improved Bismarck. By setting 4 x 4 inches they will produce but one terminal spike like the Excelsior strain and with regular Bismarck setting they have a grand terminal spike and many laterals. If you've tried them you know they are valuable. If not we suggest a trial.

VARIETY	COLOR	Price per 100
GOLDEN GATE:	Rich yellow.	\$1.00
MOJAVE:	Royal purple. Very fine.	1.00
MONTEREY:	Finest glowing pink.	1.00
PACIFIC:	Very fine deep blue.	1.00
SANTA BARBARA:	Chamois. A very usable color.	1.00
SANTA MARIA:	Finest white. Probably the best known of this group.	1.00
SEQUOIA:	A grand carmine rose.	1.00
THE REDWOODS:	An excellent blood red.	1.00
TAHOE:	A very usable lavender. Always a popular color.	1.00
YOSEMITE:	Rose. A shade that is widely popular.	1.00
DOUBLE GIANTS OF CALIFORNIA SUPERB MIXED:		.90

PERENNIAL PLANTS

We have a very modest stock of this group again this year having to curtail our operations in these plantings from pre-war levels because of the labor situation. These plants were all sown the summer of 1943 and may be potted or transplanted for retail this spring; or they may be grown on for heavy specimen plants to meet the demand next fall.

VARIETY	Price per 25	100
ALYSSUM—		
Saxatile Compactum: "Gold Dust". About 12" tall.	\$.50	\$1.50
ANCHUSA—		
Italica Feltham Pride: Dwarf light blue. Height 15".	1.00	3.00
AQUILEGIA—		
Crimson Star: Deep crimson, white corolla.	1.00	3.00
Longissima: Delicate pale yellow. Very long spurred.	1.25	4.00
Waller Franklin Hybrids. The best long spurred mixture.	1.00	3.00
BELLIS—	English Daisy.	
Monstrosa Red. Giant flowering deep red.	1.00	3.00
Monstrosa Tubulosa Etna: Bright rosy red with quilled petals.	1.00	3.00
CAMPANULA—	Canterbury Bells.	
Calycanthema Blue. Cup and saucer Canterbury Bells.	1.00	3.00
Calycanthema Mixed: A nice blend of color.	1.00	3.00
CARNATION—	Chabaud's Giant Double.	
Aurora: Coppery salmon. 16" tall.	1.25	4.00
Flesh Pink: A delicate soft pink.	1.25	4.00
Jeanne Dionis: Very fine pure white.	1.25	4.00
Legion of Honor: Glowing salmon rose.	1.25	4.00
Nero: Fine deepest crimson. A good color.	1.25	4.00
The Pearl: A really good clear pink.	1.25	4.00
Finest Mixed: Made up from all the above colors.	1.00	3.00
CARNATION—	Grenadin.	
Black King: A really dark red. The darkest Carnation.	1.25	4.00
Cardinal: Cardinal red of brilliant hue.	1.25	4.00
Golden Sun: A very fine medium yellow.	1.25	4.00
Snow White: Pure white of very good size.	1.25	4.00
Grenadin Mixture: Made up from all the colors of this type.	1.25	4.00
CARNATION—	Perpetual Double Giants.	
Superb Mixture: A well balanced mixture of all shades.	1.50	5.00
DIANTHUS—	Pinks.	
Sweet Wivelsfield: Fine double mixed.	1.00	3.00
DIGITALIS—	Foxglove.	
Gloxiniflora The Shirley. Large flowers with spotted throats.	1.00	3.00
GAILLARDIA—	Grandiflora.	
Goblin: Dwarf deep red bordered yellow.	1.00	3.00
Portola Hybrids: Large red and yellow.	.90	2.50

WALLFLOWER		
Double Extra Choice Mixed: Early flowering. 20" high.	1.00	3.00

PERENNIAL SEEDS

We stock a rather complete assortment of these. Many of the items we now have in stock are scarce if not generally impossible to find. For a complete price list see the August First 1943 edition of this publication. Most of this group can be started in early spring and with a summers growth afford nice stock for transplanting into the permanent location during the fall. If you don't have a copy of the above mentioned list we will be glad to mail a copy free.

On the following page we list a timely selection of Florist Strain flower seeds that will be found most useful at this time. This group covers the best of the varieties of value to the professional grower and they are all seeds that have been grown for this specific professional use. We believe that you will find our stock superior and our prices competitive. If we knew of any better stock, regardless of price, that is what we would be supplying. After all the seed cost is so slight in comparison with cost of growing labor and selling price that it is one thing which should NEVER be compromised.

The list of varieties given here is by no means the extent of our Specialist Grown stock as you will find by consulting back issues of this publication. These are the varieties that are most seasonable NOW.

Florist Strain Flower Seeds

Terms of Sale

PRICES— All prices are made on a basis of cash with order. No deviation will be made from this rule except where special credit arrangement and usual reference check has been made. **SEEDS** can be sent C. O. D. and will be so forwarded in all instances where the above rule is not met. Strictly cash with order on all shipments outside the U. S. A. **PLANTS AND BULBS ARE NEVER** sent on a C. O. D. basis. **ALL** prices quoted herein are subject to any change in market or business regulation which may become effective after date of publication.

REMITTANCE— May be by any of the usual commercial methods of transferring funds. The amount must be in United States money, collectable net, for the full amount of the order. **WE WILL NOT** accept postage stamps as any part of remittance. We use metered postage exclusively and stamps are a total loss.

TRANSPORTATION— **SEEDS** will be shipped by insured post, prepaid. Free Air Mail delivery may be had on seeds under conditions mentioned elsewhere in this list. **PLANTS AND BULBS** are delivered in so far as our responsibility is concerned when accepted by the transportation agency at Grants Pass, Oregon. Thereafter all goods travel as the property of the purchaser. We recommend that all perishable material travel Railway Express and unless instructed differently this material will all be forwarded by that agency.

OUR RESPONSIBILITY— In view of the reasonable prices quoted herein and the varied conditions under which this stock will be grown after leaving our care, it is manifestly impossible for us to guarantee in any manner, descriptive or cultural, the crop resulting from the use of the material listed. Ordering from this list will definitely be construed as your acceptance of these terms as set forth and it is understood that in all cases our liability shall be limited to the actual purchase price paid for any material supplied.
